REQUEST FOR A CORRECTED OR REVISED PATENT APPLICATION
PUBLICATION UNDER 37 C.F.R. §1.221(b)

Sir:

Certain printing errors appear in the patent application publication identified above. The errors appear in the specification and are apparent from the USPTO records. It is respectfully requested that a corrected patent application publication be granted for the above-identified application, in accordance with 37 C.F.R. §1.221(b). This request is made in order to correct the material mistakes incurred through the fault of the Patent Office.

For the convenience of the office personnel, the necessary corrections have been set forth in the attached sheet, which specifically references the portion of the original specification where the correct text for the material mistakes appears in the application.

It is not believed that fees are required, however, any required fees therefore are hereby authorized to be charged to Deposit Account No. 16-0605.

Respectfully submitted,

Ryan W. Cagle

In re: Demitz *et al.*
Appl. No.: 10/511,122
Filed: June 20, 2005

On page 1, in the right-hand column of the publication, the text of the Abstract section is not found in the present application. The correct text of the Abstract should read as follows:

ABSTRACT

The present invention is a polymer-containing cosmetic hair care agent comprising one or more pregelatinized, crosslinked starch derivatives. Preferably, the hair care agent further comprises one or more polymers. In one embodiment, the polymer includes cationic polymers. In another embodiment, the polymer includes nonionic, amphoteric, or anionic polymers.

The above, correct, text for the Abstract can be found on page 2 of the Preliminary Amendment filed June 20, 2005. This Preliminary Amendment was filed together with the English language translation of the present application, which was originally filed in the German language.

Figures 1-4, as illustrated on Sheets 1-4 of the publication, have been incorrectly added by the Office to the present application. The incorrectly added figures appear to have been taken from a reference submitted in an Information Disclosure Statement and incorrectly scanned into the USPTO electronic filing system as part of the present application. To ensure clarity, Applicants note that there are no drawings associated with this application, and Figures 1-4 should be removed from the publication. To this end, Applicants reference the Official Filing Receipt issued November 23, 2005, which indicates no drawings were filed.
